NERVOUS DYSPEPSIA

A Desperately Serious Case Cured by Dr. Williams' Pink Pills.

Brought to the very verge of starvation by the rejection of all nourishment, her vitality almost destroyed, the recovery of Mrs. J. A. Wyatt, of No. 1189 Seventh street, Des Moines, Iowa, seemed hopeless. Her physicians utterly failed to reach the seat of the difficulty and death must have resulted if she had not pursued an independent course suggested by her sister's experience.

Mrs. Wyatt says: "I had pain in the region of the heart, palpitation and shortness of breath so that I could not walk very fast. My head ached very badly and I was seized with vomiting spells whenever I took any food. A doctor was called who pronounced the trouble gastritis, but he gave me no relief. Then I tried a second doctor without benefit. By this time I had become very weak. I could not keep the most delicate broth on my stomach, and at the end of a month I was scarcely more than skin and bone and was really starying to death.

Then I recalled how much benefit my sister had got from Dr. Williams' Pink Pills and decided to take them in place of the doctor's medicine. It proved a wise decision for they helped me as nothing else had done. Soon I could take weak tea and crackers and steadily more nourishment. In two weeks I was able to leave my bed. Dr. Williams' Pink Pills were the only thing that checked the vomiting and as soon as that was stopped my other difficulties left me. I have a vigorous appetite now and am able to attend to all the duties of my home. I praise Dr. Williams' Pink Pills for Pale People to all my friends because I am thoroughly convinced of their merit."

Dr. Williams' Pink Pills are sold by all druggists and by the Dr. Williams Medicine Co., Schenectady, N.Y.

Had Learned the Words.

It was a lecture on health, delivered before a roomful of working girls. The word oxygen had been used. Immediately one of the girls rattled out glibly: "I know-oxygen, hydrogen, nitrogen." "Well, what do you know about them?" asked the nurse. "Oh, I don't know nothin 'about 'em, but we learnt 'em at school," was the answer.

Caucasus Hospitality.

In the southern Caucasus a traveler any house and be sure of a welcome and the best available fare. The host takes care personally that nothing is stolen. Yet the same host, when the guest has left his home, may follow and rob him after he has gone a few

Spade Guineas.

The tenant of a Hertfordshire, Eng., farmhouse looking through some old books, found in Dr. Croley's "Salathial" a penciled note indicating that valuables were hidden under an attic floor. Wrapped in quaint silldresses of the Georgian period were found forty spade guineas and other

Most Expensive Thermometer.

The most expensive thermometer is in use at the John Hopkins university in the United States. It is valued at \$10,000 and is an absolutely perfect instrument. The graduations on the glass are so fine that it is necessary to use a miscroscope to read them.

Pays for False Advertising.

Leo Cohn, a merchant of Spandau, Germany, advertised the sale of a stock of goods at less than half cost. A buyer proved that more than half the cost price had been charged for an article he had bought and the merchant was fined \$45.

Some way or other a host is more convinced by the guest who says he has had a bully time than by the one who says it has been a delightful occasion.

A NECESSARY EVIL.

Experience of a Minister Who Tried to Think That of Coffee.

"A descendant of the Danes, a nation of coffee drinkers, I used coffee freely till I was 20 years old," writes a clergyman from Iowa. "At that time I was a student at a Biblical Institute. and suddenly became aware of the fact that my nerves had become demoralized, my brain dull and sluggish and that insomnia was fastening its hold upon me.

"I was loath to believe that these things came from the coffee I was drinking, but at last was forced to that conclusion, and quit it.

"I was so accustomed to a hot table beverage and felt the need of it so much, that after abstaining from coffee for a time and recovering my health, I went back to it. I did this several times, but always with disastrous results. I had about made up my mind that coffee was a necessary

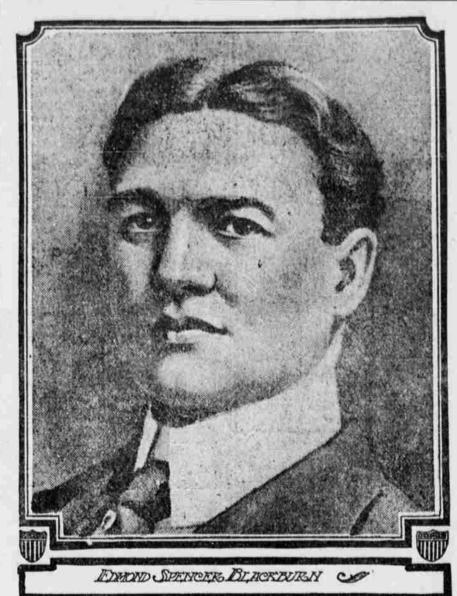

"About this time a friend told me that I would find Postum Food Coffee very fine and in many respects away ahead of coffee. So I bought some and, making it very carefully according to the directions, we were delighted to find that he had not exaggerated in the least. From that day to this we have liked it better than the old kind of coffee or anything else in the way of a table drink.

"Its use gave me, in a very short time, an increase in strength, clearness of brain and steadiness of nerves; and sleep, restful and restoring, came back to me.

"I am thankful that we heard of Postum and shall be glad to testify at any time to the good it has done me." Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville," in

may still apply for food and shelter in STILL POWER IN JOURNALISM. | PEN SKETCH OF THOMAS HARDY

Theodore Tilton, Seventy Years Old, Keeps Up His Work.

Only a few weeks ago Theodore Tilton celebrated his seventieth birthday anniversary at his residence on the Avenue Kleber, in Paris. As a rule, his natal anniversaries are marked by gatherings of the American literary set. Tilton recites a poem or makes an address. This year the function was postponed and the report went the rounds that the last had been held. Mr. Tilton is, however, in fairly good health. He keeps up his journalistic work, though he does not care to have it more particularly identified. From the day the are said to read him oftener than they read some other American correspondents residing in Europe. His contributions appear under various names. It is reported that he has prepared a full statement of the whole difficulty between himself and Henry Ward Beecher, which will be brought out by a leading New York publishing house thirty days after his death.

Japanese Exodus to Korea.

Every batch of news from Korea left their islands and landed on the valleys that may be turned into fine gardens. This movement of the Japanese farmers to the mainland was to be expected as soon as the predominbe asserted. There is not a country in covered with mountains that are magnificent but can never be made to rapidly increasing people. The Japanese government is encouraging this industrious farmers and the large area of fertile lands still lying waste in Korea bids fair to give the opportunity that is so sorely needed by the swelling tide of Japanese life.

Protection of Wild Life.

Is there any way of accounting for the propensity manifested by a large number of people to kill something for the sake of killing it% It is not inherited from our savage ancestors. They tortured and killed their enemies, but never slew wild animals except for use, and never more than were needed. Civilized man, so-called, however, goes out into the woods and fields with murder in his heart and enough to keep out of his way, nothing so innocent, harmless or beautiful as to escape his thirst for slaughter, and very little that swims, flies or runs is too small for him to hunt down-Washington Post,

Force of Environment Compelling.

Scientists are continually telling us that things adapt themselves to their | in Catalonia, Normandy, Yorkshire and environment. It is an inevitable law of nature. If you go down into the sea to a sufficient depth you may find there fishes that have eyes but no of the Anglo-Saxons; Austria from the sight. Scientists declare that the fish Tyrolese highlands. In Italy the had sight once, but being tempted to progress of physical degeneration has He in darkness, the sight at last went. extended to the upper Apennines, but People are more like these fish than they are apt to imagine. They are letic race, and the natives of the affected by the things around them- | Caucasus are as sinewy and gaunt as affected, too, without knowing it.

Eminent Author Not Adapted for the Role of "Lion."

Thomas Hardy, though a frequent visitor to London, still makes his home in Dorchester, near which he was born and where he has lived almost his entire life. He is said to be quite indifferent to the social fame that successful novel-writing brings. "He always looks a little too grave and distant to be quite at his ease in the midst of the jangle of smart conversation," writes a correspondent who has seen the author recently, "but at a small literary dinner he becomes at once sympathetic and interesting and can be grave and gay. In stature Tilton-Beecher jury disagreed he has he is short, trimly built; the face is shunned the public gaze of his coun- intellectual, the forehead deeply lined trymen at home, though Americans with thought, the dome of the head expansive and thinly covered with hair. The eyes are meditative, cautious; now and then lighting up with kindly humor, but generally very sad. Mr. Hardy always looks as though he were a watcher, sitting apart from the battle of life and noting down the defeats of the day."

Mind Controls Matter.

The physical effects of mental causes have had striking illustration within the last six months in the cases tells of migrating Japanese who have of several of our fellow townsmen. The heads of the chief insurance combig peninsula, where they expect to panies which were investigated went settle in one or another of the fertile | successively to bed as though they had been poisoned with a slow poison. Mr. Hyde is still young, and the vigor of youth brought him through all distresses without any obvious impairance of Japanese influence began to ment of vitality, but it went hard with the older men. Mr. Alexander the world that needs more room than broke down completely under the Japan does, with its 48,000,000 people strain, and his fellow presidents both and seven-eighths of its island empire in turn took sick. So it has been with Justice Duell, who went down before the exposures of the Town Topics contribute largely to the support of a trial as though he had been struck with a club. The firing line is not considered a healthy place, but it is western movements of its frugal and plenty enough healthler to be there than to be the target.-Harper's Weekly.

Life of German Crown Prince.

Since his marriage the German erown prince has turned over a new leaf and is settling down strenuously. He is full of plans for developing his princely estate at Oels and has promised to double the salaries of his employes if they produce the best wheat and rye in Silesia. He talks of cultivating beets and manufacturing sugar on his own land and has started building model cottages for his tenants. He says himself he "is never so happy as when he has more work than he can get through," and that without calls it sport. Nothing is cunning work he "begins to rust." He has no taste whatever for military life, but takes an immense interest in social questions. He is devoted to the crown princess, who exercises the greatest influence not only on him but on all the court.

The Tallest Men of Europe.

The tallest men of Europe are found the Ardennes district of Belgium. Prussia gets her tallest recruits from Schleswig-Holstein, the original home the Albanian Turks are still an athin the days of the Argonauts.

TREASURE OF ART FOR FRANCE.

Valuable Painting Brought from Italy to the Metropolis.

Theodore Coe arrived from Italy this week, bringing a curious large painting entitled "The Mouth of Hell," representing monster jaws toward which are drawn human beings in the midst of flames.

It is supposed to be part of an original composition of Maffeo da Verona, which served in the decoration of one of the cupolas of St. Mark's. Mr. Coe discovered it at the home of a priest in Venice, who kept it rolled up in a lark corner, not suspecting that he had a work of art of great historical value. He declared a high valuation o the official charged with authorizing the exportation, who said it was too high, and allowed Mr. Coe to take he picture from the country on a leser valuation.

The inspector at the bureau of exportation in Milan declares he gave he permit simply because the paintng was not of great artistic or intrinde value.-New York Herald.

PRINCESS WOULD WED MARQUIS

Nephew of English King Said to Have Bestowed Love.

Princess Patrica, who, it is reportd, desires to wed the young Marquis f Anglesey, is the third child and secand daughter of Prince Arthur, Duke of Connaught, brother of King Edward of England. Patricia was born in

Buckingham Palace, London, March 17, 1886. Her full name is Victoria Patricia Helen Elizabeth. She made her debut a little over two years ago and is said to be one of the prettiest princesses of the reigning house. If rumor is to be credited, she has had many suitors, including King Alfonso, who is to wed her cousin, Princess Ena of Battenberg, and Prince Eitel Frederick of Germany. Patricia is reported to entertain affection for Lord Anglesey.

China's Empress Woman of Force.

The dowager empress of China has been compared with Elizabeth of England and Catherine of Russia. Her force of character has enabled her to maintain her authority in all the turmoil and intrigue and rebellion which has beset China in recent years. She has absorbing vanity, in which she is like Queen Elizabeth, and a German artist, who has lately painted her portrait, has been describing the experiences. The painter made a portrait as true to life as could be, but this was entirely unsatisfactory to the royal patron. She is over 70 years of age, but she wanted a painting of a woman in the full bloom of youth. The painter had to depict her as a woman of 25.

Makes Carriage Floral Bower.

Most fashionable women have the cushions of their carriages perfumed with sachet bags, but the Baroness Elizabeth Rosen, daughter of the Russian ambassador to this country, has more poetic ideas. She has a charming little coupe, and at the sides, where another woman would have a mirror, a powder puff and hairpins, she has two contrivances which hold water and keep a handful of violets fresh and fragrant. It is a delight to step into this carriage. The baroness is going to have additional flower stands in the coupe, and, unlike the girl who had rings on her fingers and bells on her toes, she will have perfume and color wherever she goes.

New Head of New York Life. Alexander E. Orr, the new head of the New York Life, is a native of Ireland and is now in his seventy-fifth year. He inherited a fortune and has been president of the New York Chamber of Commerce and the Produce Exchange. He served on Gov. Tilden's canal commission and aided in exposing the canal ring in 1875. He is a director in several large financial institutions. He was a democratic presidential elector in 1876. He is a member of the Hamilton Club, the Long Island Historical Club, the Long Island Historical Society and Grace Episcopal church, Brooklyn.

The Job That Jarred.

One of the small army of "hands" employed on one of the Staten Island municipal ferryboats was busily engaged in trying to polish a piece of brasswork. He looked so glum and sour and was so evidently inclined to throw up the job that a passenger remarked: "You-er-don't seem to like your task."

The man looked up with a savage glance and replied. "Like it! This is a h-1 of a job to take a civil service examination for."-New York Press.

FOUGHT WITH EAGLE

CREW OF LOCOMOTIVE IN A DES-PERATE STRUGGLE.

Monarch of the Air Makes Work for Three Men Before It Can Be Subdued-One of the Largest Ever Captured Alive.

Fighting desperately not only for themselves, but for the lives and safety of over 100 passengers, Frank Barlow, engineer, and William Brewington, fireman, battled for half an hour Sunday night in a swaying locomotive cab with a great eagle, says the Denver Post.

The hand-to-talon combat started when the Rocky mountain limited was three miles west of Agate, and the men were unable to subdue the feroclous bird until the train pulled into Limon. It was a running fight for twenty miles.

Frank Barlow, who lives in Denver at South Ninth and West Colfax avenue, has been connected with the line for thirty-five years, and he says that this is the first time that such an adventure has ever been encountered on a moving train in the history of rail- inch on the rock confining the gas. roading.

Two big eagles have made their nest near Agate for the last ten years, and they appeared fearless of man or rushing trains. Sunday night the limited to Chicago had just passed Agate, Col., when one of the eagles raced with the train. The bird became infuriated and flew into the open window of the engine cab. The other eagle followed and although the train was speeding across the prairies at over fifty miles an hour, it circled time and again over the cab, screaming weirdly, while its mate engaged in a fight for life with the trainmen.

The eagle struck Engineer Barlow a terrific blow on the chest as it flew down through the front-window of the cab, and he fell from his seat.

The throttle was wide open and the engine pounded out the miles, endangering the lives of all on the train, while Barlow and Fireman Brewington struggled with the feroclous bird. Barlow started back to his levers, when Brewington called out for help,

as he could not fight the bird off alone. The roar of the train drowned their cries, but John Snyder, the brakeman, noticed that something was wrong and went ahead. As Snyder crept down over the coal in the tender the eagle left Barlow and Brewington and attacked him savagely. Snyder carries his left arm in a sling as the result. The eagle fastened its talons in his biceps and, bracing itself against the sides of the cab with its

wings, tore viciously at Snyder's arm. By combined efforts the other two men finally pulled the talons out of the flesh, leaving a very dangerous wound.

The eagle was finally beaten down, but still fought flercely, lying on the floor and striking up into the air.

This dramatic battle was lighted only by the lurid flames shining through the furnace door. The eagle was bound with leather

thongs and brought to Denver, where it will be placed on exhibition. It is a magnificent bird and meas-

ures seven feet and eleven inches from tip to tip of its wings.

It is one of the largest eagles ever captured alive.

A Question.

We say cruel things of our statesmen We make pictures queer and ridiculous rhymes, Like most other blessing's humanity's known, We hold them in scanty esteem till they're

flown. Now, what would we do for the gay reor the tragical protest that's uttered so free.

Or the eloquent speeches to praise or con Oh, what would we do if it wasn't for them! demn-

So, let us speak kindly, nor utter a doubt That may bring an executive session For they add to our knowledge and banish our fear;
We know that the time won't go slow when they're here. Oh, think of the long, drowsy days when they roam, Repairing their fences and records at

Then hope like a blossom repines on the Oh, what would we do if it weren't for -Washington Star.

Preacher Bragged Too Much. A farmer in central New York state has in his employ a man named George whose understanding is not very acute. One day as his employer came out to the field where he was working, George hailed him, "Say, Boss, who do you like best, Mr. Gorman or Mr.

churches are in the neighborhood. "Well," said the farmer, "I couldn't say. I never heard Mr. Gorman preach."

Carney," nam' 5 two ministers whose

"I don't like that man Carney," said George; "he brags too much. I went to his church last Sunday and he didn't talk about anything but his father's mansions and brag about how much finer they were than anyone else's."-Lippincotts.

Vagaries of Fortune.

Kubelik, writing of the "Days of His Youth," in M. A. P., says that his father had only a small market garden upon which to support himself and his family. Kubelik himself lives at Bycher Castle, in Bohemia. "Within the pleasure grounds are gardens ten times as large as the little vegetable patch at Michle from which my father won the maintenance for his wife and family. My flower and vegetable beds of to-day yield me no revenue, but for their upkeep demand a yearly sum which my dead father would have deemed a satisfying income. How sad is the world."

And This in Boston?

"Why don't you advertise 'pants and vests'?" I asked a dealer in a downtown place the other day. "I should suppose it would be quite as well to call them trousers and walstcoats." He looked at me for a moment and said: "I advertise pants and vests because if I advertised as you suggest half and probably more of those who come in here to trade would not know what I meant,"-Boston Evening Record.

DIED SUDDENLY

OF HEART DISEASE.

How frequently does a head line simi-How frequently does a head line similar to the above greet us in the newspapers. The rush, push and strenuousness of the American people has a strong tendency to lead up to valvular and other affections of the heart, attended by irregular action, palpitation, dizziness, smothered sensations and other distressing symptoms.

Three of the prominent ingredients of which Dr. Pierce's Golden Medical Discovery is made are recommended by some

which Dr. Pierce's Golden Medical Discovery is made are recommended by some of the leading writers on Materia Medica for the cure of just such cases. Golden Seal root, for instance, is said by the UNITED STATES DISPENSATORY, a standard authority, "to impart tone and increased power to the heart's action." Numerous other leading authorities represent Golden Seal as an unsurpassed tonic for the muscular system in general, and as the heart is almost wholly composed of muscular tissue, it naturally tollows that it must be greatly strengthened by this superb, general tonic. But probably the most important ingredient ened by this superb, general tonic. But probably the most important ingredient of "Golden Medical Discovery," so far as its marvelous cures of valvular and

as its marvelous cures of valvular and other affections of the heart are concerned, is Stone root, or Collinsonia Can., Prof. Wm. Paine, author of Paine's Epitomy of Medicine, says of it:

"I, not long since, had a patient who was so much oppressed with valvular disease of the heart that his friends were obliged to carry him up-stairs. He however, gradually recovered under the influence of Collinsonin (medicinal principle extracted from Stone root), and is now attending to his business. Heretofore physicians knew of no remedy for the removal of so distressing and so dangerous a malady. With them it was all guess-work, and it fearfully warned the afflicted that death was near at hand. Collinsonin unquestionably affords relief in linsonin unquestionably affords relief in such cases, and in most instances effects a

Stone root is also recommended by Dra. Hale and Ellingwood, of Chicago, for valvular and other diseases of the heart. The latter says: "It is a heart tonic of direct and permanent influence."
"Golden Medical Discovery," not only cures serious heart affections, but is most efficient general tonic and invigorator, strengthening the stomach, invig-orating the liver, regulating the bowels and curing catarrha; affections in all

parts of the system. Dr. Pierce's Pellets cure Constipation.
